PROFESSIONAL PROFILE

I am a dedicated and results-oriented System and Software Developer with over 2 years of hands-on experience in full-stack development, delivering reliable web and mobile applications. I have strong proficiency in programming languages including Java (OOP), Dart, Python, JavaScript, PHP, MySQL, HTML, CSS, and Visual Basic for Desktop Application development. I am experienced in using modern frameworks and tools such as Flutter, Django, Laravel, RESTful APIs, Git, and TypeScript to build scalable, secure, and user-friendly systems that meet business and user requirements.

In addition to development, I bring valuable experience in project management, system testing, and quality assurance, including designing test cases and conducting system and user acceptance testing (SIT and UAT) to ensure high-quality delivery. I also have foundational knowledge in system security and penetration testing, enabling me to contribute to secure application development.

EDCATION BACKGROUND

DURATION	PROGRAM STUDIED	AWARD INSTITUTION	AWARD
2021-2024	Bachelor of Science in Computer Science	Institute of Finance Management	Bachelor of Science in Computer Science
2019-2021	Ordinary Diploma in Computer Science	Institute of Finance Management	Ordinary Diploma in Computer Science
2018-2019	Basic Technician Certificate in Computing and Information Technology	Institute of Finance Management	Basic Technician Certificate in Computing and Information Technology
2013-2016	Ordinary level Secondary Education	Mikumi Secondary School	Certificate of Secondary School Education
2006-2012	Primary School Education	Mikumi Primary School	Certificate of Primary School Education

LANGUAGE PROFICIENCY

No:	Language	Speak	Read	Write
1.	Swahili	Very good	Very good	Very good
2.	English	Good	Good	Good

WORK EXPERIENCE

1. Finsys Tech Solutions Limited, Dar es salaam, Tanzania.

I. Project Manager.

November 2025 – Present.

Projects:

1. Management Information System for MoBEF (Ministry of Blue Economy and Fisheries) - Revolutionary Government of Zanzibar. [link](#)

Key Responsibilities:

- Led the end-to-end project lifecycle, defining project scope, milestones, and deliverables to ensure alignment with government requirements.
- Acted as the primary liaison between technical teams and stakeholders, ensuring clear communication and effective expectation management.
- Coordinated cross-functional teams (developers, designers, and QA) using Agile methodologies to ensure timely delivery of system modules.
- Monitored project risks and resources, generating detailed progress reports to track budget adherence and implementation status.

II. Full Stack Developer August 2025 –

Present.

Projects:

1. Mobile Application Development: [link](#)
2. Web Application Development and Maintenance: , [Admin Pannel link](#), [Website link](#)

Key Responsibilities:

- Led the end-to-end design, development, and implementation of the Management System, comprising a Python-based backend, a Flutter mobile application, and a PostgreSQL database, ensuring scalability, security, and performance.
- Designed and implemented RESTful APIs using Python (Django) to support seamless communication between the backend system and the Flutter mobile application.
- Designed, optimized, and managed the PostgreSQL database, including schema design, data integrity constraints, indexing, and performance tuning.
- Implemented authentication, authorization, and data security mechanisms, ensuring secure access and compliance with best practices.
- Maintained and enhanced existing systems by identifying issues, implementing improvements, and ensuring system stability and scalability.

III. System Tester, and Quality Assurance.

January 2025 – Present.

Projects:

3. NCC (National Construction Council) Construction Cost Estimation System: [link](#)
4. TPC (Tanzania Posts Corporation) E-Commerce: [link](#)

Key responsibilities:

- Conducted comprehensive manual and automated testing for system to ensure functionality, reliability, and performance.
- Developed detailed test plans, and test cases based on functional requirements.

- Performed system integration testing, and user acceptance testing to validate new features and changes
- Collaborated with developers, and project manager to resolve issues and improve software quality.

2. The Institute of Finance Management (IFM).

I. System Developer - Final Year Project.

November 2023 – July 2024.

Projects:

1. Maternal Health Management System. [GitHub link](#)

Key responsibilities:

- Developed and implemented the Maternal Health Management System to improve the tracking and management of maternal health records.
- Generated clinic cards to track expectant mothers' clinic attendances.
- Integrated a question-and-answer module, enabling mothers and health professionals to interact with AI for timely responses.
- Developed a predictive model to estimate the expected delivery date using the Last Normal Menstrual Period (LNMP).
- Sent SMS notifications to expectant mother post-registration, updating them on their registration status and subsequent health tests and immunizations.

II. System Analyst – Project Work.

November 2021 – July 2022.

Projects:

1. Graduands Clearance System.

Key responsibilities:

- Conducted thorough requirements analysis to identify the needs and challenges faced by the graduands clearance process.
- Designed system workflows and user interfaces to facilitate smooth interaction between students and the clearance system.

- Developed functional and technical documentation to guide the development and implementation phases.

3. HISP Tanzania, Dar es Salaam, Tanzania.

I. System Developer – Field Practical Training.

August 2022 – October 2022.

Projects:

1. Program Indicator Disaggregator: [GitHub link](#)

Key responsibilities:

- Extended disaggregation capabilities by utilizing DHIS2 variables and constants.
- Enhanced disaggregation functionality by incorporating additional operators and ranges.
- Added a comprehensive program indicator dictionary to improve data categorization.
- Implemented compound disaggregation using multiple variables, constants, data elements, and attributes.

PROFFESIONAL TRAINING COURSE ATTENDED

1. WHO (World Health Organization) metadata packages.

October 2022.

The training was conducted at the HISP Tanzania Office, Dar es Salaam, Tanzania, as part of a collaborative initiative between **HISP Tanzania** and **HISP Uganda**.

Key Skills / Competencies Gained:

- Importing metadata file in DHIS2 platform.
- Data quality, and data input validation.

PROFESSIONAL SKILLS

- System and mobile development.
- Desktop Application development using Visual Basic.
- RESTful API.
- District Health Information System 2 (DHIS2) platform.
- Cyber security, and Ethical Hacking using Kali Linux.
- Git repositories.
- Trello for web-based project management.

OTHER SKILLS

- Experienced in conducting statistical data analysis using SPSS (Statistical Package for the Social Sciences).
- Demonstrated ability to leverage Artificial Intelligence (AI) tools such as Cursor AI and Gemini to streamline processes, increase productivity, and deliver tasks efficiently.
- Certified driver with a valid Class D driving license and formal driving training.
- Skilled in using Microsoft Office tools, including Excel, Word, and PowerPoint, to support daily office tasks and documentation.
- Skilled in utilizing the Aronium desktop application to manage inventory efficiently and track sales performance.

PROFFESIONAL CERTIFICATIONS

No:	CERTIFICATION NAME	INSTITUTION	YEAR
1.	Introduction to Cyber Security	CISCO	2024
2.	Digital Awareness	CISCO	2025
3.	Introduction to DHIS2 (District Health Information System 2)	HISP center, University of Oslo – Online Academy	2022
4.	Aggregate data capture and validation fundamentals	HISP center, University of Oslo – Online Academy	2022

5.	Introduction to Cyber Security	Simplelearn - Online Learning Platform	2022
6.	Responsive Web Design	Sololearn - Online Learning Platform	2021
7.	Web Development Fundamentals	Sololearn - Online Learning Platform	2022
8.	SQL Intermediate	Sololearn - Online Learning Platform	2023
9.	PHP (Hypertext Preprocessor)	Sololearn - Online Learning Platform	2020
10	JavaScript	Sololearn - Online Learning Platform	2022
